

### 3rd day report from ground team

- today we reached Betrawoti after leaving camp on Simtar near trisuli bazar
- We are surveying camp at a hill with above 70/80 people who have mostly lost their homes or were renting place at Betrawoti
- The survey is still ongoing so the things needed will be said tomorrow but toilet is a mixed major problem that we need to help with
- They have tents and food, cloths etc are coming but very less compared to the school holding center at simtar
- We can definitely help with food cause if more food doesn't come food is expected to finish in not even a week
- There are children's so we can do something about it too
- More people are expected to come as they have left to do kriya for their family
- The walking trail from simtar to Betrawoti is dangerous so not recommended
- There are ways for 4 wheelers to reach here
- Today we made contact with hami Nepal as well
