

Day 4 — Relief and Holding Center Field Report

Yesterday, we reached Nilakantha Secondary School, which is currently being used as a temporary holding center for children affected by the floods.

Access and Transportation

Reaching the school has become considerably more difficult due to the destruction of the bridge connecting the Bitrawoti–Rasuwa/Uttargaya side from the jungle camp where our team is currently staying. The bridge has been washed away by the flood, leaving us with no direct vehicle access.

At present, we have to walk for approximately 1 hour and 15 minutes to reach a suspension bridge and then arrange transportation to the school. If vehicles are unavailable, the journey requires an additional one hour or more of walking. This has made transportation of relief materials and movement of team members particularly challenging.

Situation at the Holding Center

Upon reaching Nilakantha Secondary School, we observed that the center had already received a significant amount of support. The school currently has a substantial stock of relief supplies, and many essential items appear to be adequately available.

Because of this, we believe that further distribution of general relief materials at this particular center should be based on a proper assessment of the remaining needs. This will help ensure that limited resources are directed toward areas where they are most urgently required.

Items Requested

Based on our assessment and the requirements of the team and holding center, the following items have been identified:

1. Construction and Repair Materials

- * Hammer
- * Nails — 2-inch, 2.5-inch and 3-inch
- * Pliers
- * Coconut rope
- * Hand saw

These materials will be useful for basic repairs, construction work, and maintenance around the affected areas and temporary shelters.

2. Food Supplies for the Team

The following basic food items have been requested to support the team during field operations:

- * Satu
- * Noodles
- * Biscuits
- * Sugar
- * Salt and other basic food supplies
- * Honey
- * Peanut butter
- * Sourdough and other suitable food items

These supplies are intended primarily for the team, as access to regular food and markets is difficult due to the damaged roads and bridges.

3. Shelter and Personal Essentials for the Team

- * One additional tent for the team
- * Basic personal necessities for team members joining the operation

The additional tent is required to accommodate the team safely and adequately at the current field camp.

4. Items Required at the Holding Center

Although the holding center has already received considerable relief support, several specific needs were identified:

- * Playing materials for children to provide recreation and reduce stress among children staying at the center
- * Mosquito repellent — 20 pieces
- * Toilet facilities and necessary supplies, which require upgrading and improvement
- * Hand wash — 2 bottles and additional packets
- * Water taps — 2–3 pieces

Particular attention should be given to sanitation and hygiene facilities, especially the toilets and hand-washing arrangements, as these are essential for maintaining a safe environment for the children and other people staying at the holding center.
