

DAY 5 FIELD SURVEY REPORT

Location: Bidur Municipality, Nuwakot

Date: 7 September 2026

Purpose: Rapid assessment of flood relief activities and gaps

Our team visited holding centers in Wards 1 and 10 and interacted with representatives and volunteers. We learned that 35–40+ holding centers are currently operating across Bidur Municipality. Patanjali and Lions Club volunteers are providing hygienically prepared food across several centers.

Key Findings

- * Ward 9: Star Boarding School and Bhairab Boarding School are accommodating around 80–90 people.
- * Devighat: Ayurvedic Center and Chandra Jyoti Vidyalaya are accommodating approximately 500–600 people.
- * The holding center in Nuwakot Durbar Square is providing food, accommodation, and services in a systematic manner, with good attention to public health and hygiene.
- * Dhunche is receiving essential relief support, while areas like Mailung and others require greater attention and further assessment.

Priority Needs

The surveyed areas have relatively good coverage of basic food and accommodation. The main gaps identified are:

- * Waste management at crowded holding centers.
- * Counseling and psychosocial support for affected people and volunteers.
- * Relief assessment and support in underserved areas, considering Mailung.
- * Internal dynamics (perception barriers)

Potential Support

Patanjali volunteers are willing to extend their hygienic food and kitchen services to remote affected areas if a four-wheel-drive vehicle is supported to them.

Recommendation

The next phase should focus on assessing other underserved areas, improving waste management, working on psychosocial support, and facilitating food services where needs remain unmet, while coordinating with existing relief groups to avoid duplication.
